## FORMULATION DESIGN AND TROUBLESHOOTING OF TABLETS

Classroom/laboratory course with live demonstrations

**The successful production of a tablet is dependent upon the knowledge and expertise of the developers, formulators, and production staff.**

This 2-day intensive and accredited course is to review the science relating to formulation and process selection in the design of tableted pharmaceutical products.

### TOPICS TO INCLUDE:

Tableting Process & Equipment, Characterization/ Design of Materials, Experimental Plans in Formulating, Pre-Processing Technology, High Shear Granulation, Fluid Bed Granulation and Drying, Tablet Formulation Ingredients, Choice of Platforms, Scale Up/Tech Transfer, Risk Elimination/ Troubleshooting

### PLANNED DEMONSTRATIONS:

Coating – Tableting - RC and Milling - Wet Granulation

#### Date

November 2-3, 2021  
8:30 AM – 4:30 PM EDT

#### Location

Federal Equipment Company  
2917 E. 79th Street  
Cleveland, OH

#### Experts

Cecil Propst  
Managing Director  
Propst Consulting Services  
Dilip Parikh  
President and CEO  
DPharma Group Inc.
